

GENERAL WARD

The General Ward in Dafodil hospital is a large room that is divided into smaller sections or cubicles, each of which is occupied by a patient. The ward is managed by a team of healthcare professionals, such as doctors, nurses, and support staff, who work together to provide medical care to patients.

Private cabins are individual rooms designed for patients who wish to have a more private and comfortable experience while receiving medical care. These cabins are typically larger than standard hospital rooms and are equipped with a range of amenities to make the patient's stay as comfortable as possible.

SINGLE CABIN

S6, S7

Private hospital cabins also typically offer more comfortable and luxurious amenities than standard hospital rooms. For example, these cabins may have larger beds with high-quality mattresses and linens, as well as comfortable seating areas for visitors. They may also have large windows that allow natural light to enter the room and provide a view of the surrounding area.

One of the primary benefits of a private hospital cabin is privacy. Patients who stay in these cabins are able to have a more peaceful and quiet experience, with fewer interruptions from hospital staff or other patients. This can be particularly important for patients who are recovering from a serious illness or injury, as they may need more rest and relaxation than they would be able to get in a shared hospital room.

SUITE ROOM

The hospital facility offers luxurious suite rooms for the patients that demands extreme comfort and the best of the medical treatment. Each suite is backed with modern medical equipment with a private bathroom, high-speed internet and flat screen TV. With our offered suites you can experience the much-needed privacy and peaceful environment with your family.
